EDUCATION

K. J. Somaiya School of Engineering, Mumbai B.Tech in Information Technology - CGPA: 8.045	2022 - 2026
Arya Gurukul International Junior College of Science and Commerce, Navi Mumbai HSC - 12th Percentage: 76.60%	2020 - 2022

EXPERIENCE

SDE Intern [Commonwealth Secretariat]	Jan 2025 - May 2025 Hybrid
- Developed an AI prototype for the Governance and Peace Directorate at the Commonwealth Secretariat, focusing on the overall architecture and core system logic. - Managed database design and integration to ensure reliable data handling and secure storage. - Collaborated on frontend development and ensured seamless connection between client and server components for optimal performance.	
In-House ML Intern [K. J. Somaiya School of Engineering]	Dec 2024 - Feb 2025 Mumbai
- Built a project focused on agricultural commodity price prediction, where my role was to develop the solution using regression algorithms overseeing data preprocessing, model training, and performance evaluation to deliver accurate market forecasts. - A research paper on this work has been written and published in Hinweis ARET 2025 Conference.	
SDET Intern [Smudg]	Jul 2024 - Aug 2024 Remote
Evaluated multiple products to ensure flawless functionality and a user-friendly experience across various test scenarios and improved overall quality and usability through detailed testing, enhancing user satisfaction.	
Web Developer - Freelance [Upwork]	Feb 2024 - Jun 2024 Remote
- Designed an e-commerce platform using Figma and web development frameworks, increasing sales by 17% and UI interactivity by 40%. - Streamlined payments and admin processes, boosting transaction ease by 50% and resolving issues efficiently.	

PROJECTS

ResQMeal: Built a food donation coordination platform using Next.js, Node.js, MongoDB, and Tailwind CSS, enabling live food listings, NGO claims, and real-time pickup tracking to reduce food waste and support community organizations.

NeuroLensIQ: Developed a deep learning-based tumor detection tool with Flask, PyTorch, and Next.js, allowing MRI uploads, real-time analysis, and result visualization to assist medical professionals in early diagnosis.

VitalLink: Created a hospital coordination system using MERN Stack, featuring blood request management, hospital dashboards, and admin monitoring to automate inventory and enhance transparency.

SKILLS

Languages: C++, Java, JavaScript, Python
Frameworks and Libraries: React.js, Express.js, Node.js, Flask, Bootstrap, MUI
Databases: MySQL, PostgreSQL, MongoDB
Tools: Jira, Docker, Git, Figma
Soft Skills: Punctual, Problem Solving, Teamwork, Project Management and Planning

CERTIFICATIONS

Applied Machine Learning in Python University of Michigan	Mar-2025
Agile with Atlassian Jira Atlassian	Oct-2024
Create Serverless Applications Microsoft	Oct-2024
Advanced React Meta	Sept-2024
